

27 November – 2 December 2023 | Cape Town, South Africa

Supported by

The IUIS Congress is the world's leading conference in the field of immunology. It brings together more than 5,000 immunologists from universities, health providers, independent research organisations and industry. It promises to be a landmark occasion for Africa and the global immunology community. This will be the first time such a meeting will be held in Africa and is also the first such meeting after the start of the COVID-19 pandemic. The Congress is hosted by the IUIS, the Federation of African Immunological Societies (FAIS), and the South African Immunology Society (SAIS). The theme of IUIS 2023 will be “Turning Discoveries into Treatments” and we hope to leverage the connectivity between human health and basic immunology – in South Africa, Africa, and globally.

IMMUNOLOGY
and DISEASES

ADAPTIVE
IMMUNOLOGY

INNATE
IMMUNOLOGY

INTER-
VENTIONS

KEY FIGURES

- ▶ Over 5,000 immunologists from 70 countries
- ▶ 5 days of scientific exchange
 - 100 Scientific Sessions
 - 4,000 Abstracts
 - 500 Oral Presentations
 - 2,300 Posters
- ▶ Workshops
- ▶ Industry-sponsored sessions
- ▶ Exhibition

You can look forward to 5 days of enhanced scientific exchange, including a series of Keynote Sessions by world-renowned speakers:

- ▶ Nobel Laureate James P. Allison
- ▶ Nobel Laureate Emmanuelle Charpentier
- ▶ Linda-Gail Bekker
- ▶ Henry Mwandumba
- ▶ Vishva Dixit
- ▶ Laurie H. Glimcher
- ▶ Alain Fischer
- ▶ Sarah Gilbert

Clive Gray, Congress President, South Africa | **Henry Mwandumba**, Congress Vice President, Malawi
Rita Carsetti, Congress Vice President, Italy | **Mark Davis**, Scientific Programme Committee Chair, USA
Miriam Merad, Scientific Programme Committee Co-Chair, USA

ABOUT IUIS

The International Union of Immunological Societies (IUIS) is an umbrella organisation for many of the regional and national societies of immunology throughout the world, whose vision is Immunology without Borders.

Our mission is to promote immunology, unite the global immunological community, create a global network of expertise and research, empower members to make significant differences, identify and address inequalities, raise awareness of key issues in immunology and contribute to global health.
